

PRODUCT END-OF-LIFE DISASSEMBLY INSTRUCTIONS

Product Category: External Options

Marketing Name / Model

Lanix mouse

Purpose: The document is intended for use by end-of-life recyclers. It provides the instructions for the disassembly of Lanix products to remove components and materials requiring selective treatment, as defined by EU directive 2012/19/EC, Waste Electrical and Electronic Equipment (WEEE).

1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

Item Description	Notes	Quantity of items included in product
Printed Circuit Boards (PCB) or Printed Circuit Assemblies (PCA)	Main board PCB	1
Batteries, excluding Li-ion batteries. All types including standard alkaline, coin or button style batteries.	All types including standard alkaline and lithium coin or button style batteries RTC battery	1
Li-ion batteries. Include all Li-ion batteries if more than one is provided with the product (such as a detachable notebook keyboaord battery, RTC coin cell, etc.)		0
Mercury-containing components		0
Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm		0
Cathode Ray Tubes (CRT)		0
Capacitors / condensers (Containing PCB/PCT)		0
Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height		0
External electrical cables and cords		0
Gas Discharge Lamps		0
Plastics containing Brominated Flame Retardants weighing > 25 grams (not including PCBs or PCAs already listed as a separate item above)		0

Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner	Include the cartridges, print heads, tubes, vent chambers, and service stations.	0
Components and waste containing asbestos		0
Components, parts and materials containing refractory ceramic fibers		0
Components, parts and materials containing radioactive substances		0

2.0 Tools Required

List the type and size of the tools that would typically be used to disassemble the product to a point where component and materials requiring selective treatment can be removed.

Tool Description	Tool Size (If applicable)
#1 Phillips Screwdriver	

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment including the required steps to remove the external enclosure:

1. Remove the internal battery (standard AA battery) accessible via the battery cover without tools needed by pulling the cover of the mouse that is located underneath the scroll wheel, then you will be able to locate the battery.

2. To locate the PCB. Remove the top cover with a Philips screwdriver.

3. Remove the PCB from the mouse housing with a Philips screwdriver.
